

Project Description and Scope:

This project replaces Schwager Drive pavement and damaged curb and gutter from Warhawk Drive to Koshkonong Drive, creating a new drive surface. Existing storm sewer inlets will be replaced/added to improve drainage along the roadway. An existing storm water basin will be expanded and modified to provide storm water management and quality improvements.

Project Justification:

The asphalt has significant cracking throughout this area, as well as rutting near the curbs. It currently has a PASER rating of 2. The concrete curb and gutter has settled in some areas and in other areas it has been damaged by snow plows. The road can no longer be patched and has deteriorated beyond repair.

Issues/Concerns:

None at this time

Estimated Project Costs:

AE fees	\$31,700
DFD fees	\$128,000
Construction plus Contingency	\$1,104,000
Total Project:	\$1,263,700

Funding:

General Fund Supported Borrowing	
Program Revenue	\$1,263,700
Gifts and Grants	
Total:	\$1,263,700

Proposed Timeline:

Submission of Documents for final review:	August 2022
Bid Date:	December 2022
Start of Construction:	May 2023
Substantial Completion/ Occupancy:	August 2023
