

*MUSIC EDUCATION
DEGREE PROGRAM (M.M.E.)*

The Master of Music Education (M.M.E.) Degree is designed to extend and improve the professional preparation of those who are already licensed to teach music.

The curriculum is designed to develop an advanced understanding for the major perspectives in the foundation of music education as well as the theories of learning and teaching that shape curricular development and music instruction. Students will develop skills that allow them to design curricula and instructional programs in music that foster the development of musical perception, performance, creation and reflection, and will engage in concentrated applied study in the student's major performing area.
