### **Introduction to Elem and Secondary Educational Administration 3 u**

Introduction to K-12 Elementary and Secondary Administration (728) is a three-credit graduate course designed to introduce students to the main themes of research and practice in American primary and secondary school leadership through a sustained investigation of the conditions for successful instructional leadership.

Our working definition is that an introduction to educational administration needs to focus on the core practices of instructional leadership. In this view of educational administration, management and leadership form a complementary relation in schools – management is necessary to create and promote stable conditions for teaching and learning, and leadership is necessary to envision and guide a school toward new frontiers of teaching and learning.

The course centers on an argument on the possibility for instructional leadership to improve student learning. Given the loosely-coupled arrangement of leadership and instructional practice, the course outlines an argument for why professional community plays a central role in sharing pedagogical content knowledge between teachers.

The anchors for this argument are drawn from *Leading for Learning*, a recent report from the Center for the Study of Teaching and Policy. The report argues that instructional leadership in schools begins with what goes on in the classroom, but extends to the school organization and the school's relation to external communities.
